

Maxus ArtWorks

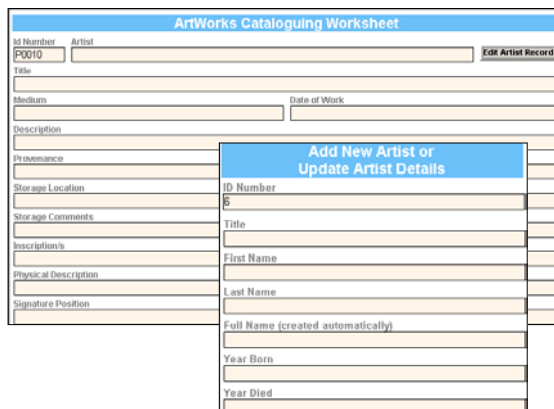

Use Inmagic DB/TextWorks® and Maxus ArtWorks to catalogue your art collection quickly and easily.

Clear navigation

A menu provides the entry point to the database

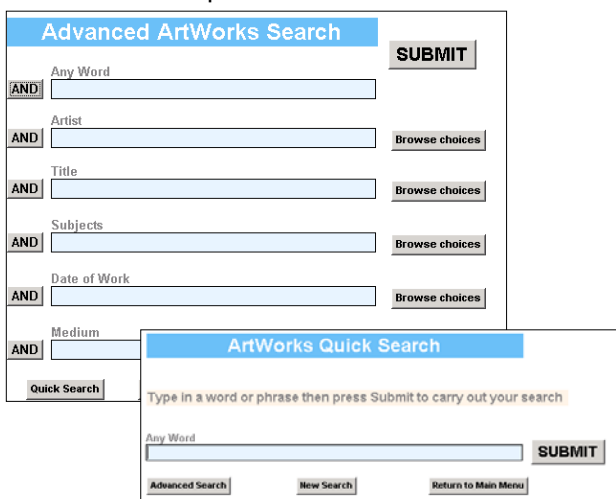

Data Entry Screens for art works and artists

SEARCHING is simple yet powerful

Choose from simple or advanced search screens:

View an **IMAGE** of an item from its Inmagic record

Colour or black and white photographs, paintings or reproductions of original documents can be included in your database and displayed.

Images can be captured using a number of tools (digital camera, scanner etc). Your textbases can include colour, greyscale and black and white images. You can search for, display, and print these images and annotate them using text and graphics.

Records can be **SORTED, DISPLAYED** and **PRINTED** in a range of forms

Forms in ArtWorks include:

- Valuation Report
- Artists and works
- Exhibition labels

In addition to the reports supplied with the system, you can also use DB/TextWork's drag-and-drop form designer to create reports to your own requirements.
